Website descriptions:

Creative COW

Creative COW (Creative Communities Of the World) is a community-oriented support website for media production professionals or enthusiasts. It was founded by Kathryn Lindeboom in 1995 going by the name of "Media 100 Worldwide Users Group." Although the core of this website is a forum in which users and mentors help one another with issues related to media production (cinematography, post-production, motion graphics, and much more), Creative COW also provides opportunities for users to upload their video projects in order to gain recognition. In addition to user content, the website features plenty of tutorials covering the entire scope of post-production, and provides podcasts, job listings, and news pertaining to the world of media production. As of May 2014, website analysis reports show that Creative COW receives 100,000

Most Important Technical Thing
